PLATINUM ORES ARE NOW WANTED

Geological Survey Issues a Circular Letter of Interest.

BINGHAM ORE PRODUCTION

NEARLY 3,500 TONS DAILY NOW COMING FROM CAMP.

The geological survey division of the department of the interior, Charles D. Walcott, director, has issued a circular letter on the subject of the platinum resources of the United States which is being given a wide distribution. It deals with the subject much in the manner explained in the statement of Professor David T. Day, chief of the mineral division in the interview with the subject much in the mineral division in the interview with the subject much in the mineral division in the interview with the subject much in the mineral division in the interview with the subject much in the mineral division in the interview with the subject much in the mineral division in the interview with the subject much in the mineral division in the interview with the subject much in the mineral division in the interview with the subject much in the mineral division in the interview with the subject much in the mineral division in the interview with the subject much in the more manner explained in the statement of the interview with the subject of the platinum resources of the United States which is being given a wide distribution. It deals with the subject much in the more manner explained in the statement of the Salt Lake mining exchange, has just purchased, for Salt Lake interests, what promises to be one of the greatest mine, is extending the cross-cut tunnel between the Eagle Bird and Northern Chief veins, begun last year. It is located about 600 feet in length. Indications are that the Northern Chief vein will be encountered in a few days. Many hundreds of tons of excellent ore were manner explained in the statement of the purchased, for Salt Lake interests, what promises to be one of the greatest mine, is extending the cross-cut tunnel between the Eagle Bird and Northern Chief veins, begun last year. It is located about 600 feet in length. Indications are the feagle with the subject of the promises to be one of the greatest mine, is extending the cross-cut tunnel and will be about the Eagle Bird and Northern Chief veins, Professor David T. Day, chief of the mineral division, in the interview with him published in The Herald about four weeks ago.

As it is certain that hundreds of niners, mine-owners and prospectors atcrested in the subject will never be reached by the letter of the department, and, as it is known to be the earnest desire of the officials to gather as much data as possible and thus aid in estab-ilshing a new and what it is hoped will be a profitable branch of the mining in-dustry, the following paragraphs of the circular, which also shows where all the platinum found in this country so far comes from, are submitted:

Samples for Testing Wanted.

"It is proposed to collect the heavy sands from all placer mines in the United States, where evidence of platinum has been found by preliminary tests. The samples thus obtained will be used in determining the best methods of extracting the various minerals." be used in determining the best methods of extracting the various minerals which have economic value. It is hoped that, in many places, the separation and sale of these useful minerals, such

and sale of these useful minerals, such as magnetite, chromite, garnet, monazite, rutile, topaz, zircon, gold, platinum, iridosmine, etc., will become a permanent and profitable industry.

"I shall appreciate all information which you can give as to the efforts previously made to separate platinum from, your sand, or from other sands in your neighborhood, and as to the quantity of platnum produced in your disyour neighborhood, and as to the quantity of platnum produced in your district. Each package of sand should be accompanied by exact information as to the name and postoffice address of the product the page of the mine or

to the name and postoffice address of the sender, the name of the mine or claim from which it came, and the state, county, city, village, or district in which the deposit is located.

"Great care should be used to pack the sand securely for transmission through the mails. It is preferable to sew up the sand tightly in a canvas bag, and tie the tag, which requires no postage, carefully to the package. The sand should be dry when mailed. On request, additional postal franks will be sent to you.

be sent to you.

"No specimens will be examined unless the above information is given in regard to the exact locality from which the samples have been obtained."

Properties of Platinum.

"Properties of Platinum.

"Pure platinum is a silvery white metal with a specific gravity of 21.5. It is the heaviest metal occurring in nature with the exception of iridosmium. It is almost as hard as iron and very malleable. Platinum does not amalgamate with quicksilver, is not dissolved by potassium cyanide when cold, is not attacked by acids, except the mixture of nitric acid and hydro-chloric acid known as aqua regia. It is more difficult to melt than gold.

"Native platinum has been found most frequently in bold-bearing sands. On account of its weight it remains in the sluices with gold and other heavy material."

readmin is most readily distinguished as follows: (1) By its great weight—in panning it remains behind even gold in the pan; (2) its white color—it is whiter than lead and is distinguished from amalgam by its smooth surface, whereas the surface of tinguished from amaigam by its smooth surface, whereas the surface of amaigam, as seen under a good glass, is rough; (3) its resistance to nitric acid, as compared with native silver or

"Native platinum is usually very impure; occasionally it contains so much iron, chromite, and other impurities as tinguished from the starless of the starless to be dark in color and not easily distinguished from grains of chromite with which it is very frequently associated. It often contains iridosmine, which occurs as flat angular scales, while platinum grains are usually rounded like gold dust. Generally, platinum grains are smaller than gold grains. Large nuggets are very rare."

which he has good assays in gold and

hope.
A. Montgomery states that Mr. E. A. Montgomery states that the Montgomery-Shoshone and Shoshone-Polaris Mining companies will immediately erect a mill on the Amargosa river at Beatty for the accommodation of the above and other mines. Consulting Engineer Malcolm MacDonald believes it is cheaper to bring the ore from the mines to the river than to pump the river to the mines. Superintendent Walter Smith of the Bullfrog National Bank mine in Ladd mountain, employs thirteen men, working three shifts. A two compartments shaft has been sunk seventy feet in rich ore. This company contemplated the erection of a twenty-stamp mill before Christmas. Water will probably be piped from the Amargosa river. Grading is now being done at the mine.

The Montgomery-Shoshone Mines company has been incorporated for 1,250,000 shares at par value of \$1 each. The officers of the great Shoshone Mines company are: E. A. Montgomery, president and general manager; Malcolm L. MacDonald, vice president and proposed of the great shoshone plating invading that field at the present time. C. W. Nicklin is the proprietor of the paper, and the manager's name is P. E. McClellan. colm L. MacDonald, vice president and consulting engineer; James C. Connor, secretary and treasurer; Mat. Hoveck, superintendent. Headquarters at Beat

superintendent. Headquarters at Beatty, where office buildings and mill will
be erected immediately.
Leading mining men are now considering the question whether it is
cheaper to pump water to the mines
near Rhyolite, or run the one by tramway down to the Amargosa river where

mine, near Beatty, loaded with rich ore sacks for Salt Lake, via Las Vegas. The ore value will average about \$800 per ton, and shipments will be made every day henceforth. This ore made every day henceforth. This ore comes from development work alone, leaving untouched great bodies of the same character. Such shipments reveal the real worth of the Montgomery-Shoshone mine, and will do much to give the Bullfrog district a substantial place in the mining world. The shipment of ore is the real test of a good mining camp. good mining camp.

HOW PEERY BOUGHT MINES.

Took Cash and Bought Up Conflicting Interests Right and Left.

A special correspondent of the Los Angeles Herald, writing from Goldfield, gives the following breezy account of the property's worth and the manner in which D. H. Peery landed his big during the absence of Manager Lavag-

runs directly through the Peery property, is admittedly one of the greatest mines in southern Nevada today, with every prospect of becoming one of the richest producers in the world.

tween \$100,000 and \$150,000 for the prop-

Rich Vein Disclosed.

where the ledge was encountered to the face of the tunnel carry values running from \$300 upwards per ton. At forty feet there is a streak three feet wide that assays 696 ounces of feet wide that assays 696 ounces of silver and a trace of gold, whereas a few feet away there is rock that returns over forty ounces of gold and about 490 of silver. Five samples of ore taken from the face show values averaging \$5.194.50 in gold and \$1,753.50 in silver, or a total of \$6,948 per ton. "When the news of this strike became generally known there was a great inrush of prospectors and buyers. Natrush of prospectors and buyers. Naturally the unclaimed one-half of Montgomery mountain, where the immension wealth had been found, was the principal goal in the race and half a dozen miners arrived on the ground at once. The result was that there were con-The result was that there were conflicting claims and trouble brewing.

Peery Acts Promptly.

"Mr. Peery was the only man in Goldfield who acted promptly. He took cash with him, climbed into an automobile and was whirled to the scene, to find the mountain tied up by conflicting claims and bristling with rifles. With the aid of C. H. Elliott, one of the owners of the Rhyolite townsite, he ownered into negotiatings with the conentered into negotiations with the contending parties, bought them all off once and for all, and purchased, outright, the whole south fact of the hill.

"Bob Montgomery, the man whom the Shoshone has made wealthy, re-grets that he did not take the property when he might have had it for a song. est on Montgomery mountain and as the croppings are the same throughout the croppings are the same throughout the values must traverse the Peery property. I regret more than I can tell that I was not fortunate enough to get the property, but I can hardly say that I begrudge Mr. Peery and his associates their good fortunal? ssociates their good fortune.'

"The Starless group consists of eight patented claims, about 115 acres. It is owned by the Bingham-Oquirrh company, the stock being held by Chicago parties."

company, the stock being held by Chicago parties.

"The mineralized porphy: which has proved to be the source of such great wealth in the Utah Copper company's ground, is known to extend into the Stocker.

Manager A. B. Greeson and C. W. Higgins of the Salt Lake Mining Review, have been doing business in the Bullfrog district during the past week. The Review is a good publication. The Original Bullfrog mine, which recently shipped seven tons of ore which netted \$5,600, continues to attract attention. Even better ore has been struck and is being sacked. Other shipments will soon be made. Postoffice inspector Harry Lewis has been visiting Gold Center, Bullfrog, Amargosa and Rhyolite to determine where postoffices should be located. Citizens of the respective towns are living in hope.

Mr. F. A. Minimager A. B. Greeson and C. W. Higgins of the Salt Lake Mining Review, have been and C. W. Higgins of the Salt Lake Mining Review, have been doing the copper resources of this camp than any other man, may be relied upon to develop the ground along effective lines, and will give his attention. The Amanda tunnel, on the south side of the group, will be several hundred feet, for the purpose of opening up the mineralized formation that has been shown to be so rich in the Utah company's lad who have studied the situation that another important producer will be developed."

THE BULLFROG MINER.

Clonden Mail, who has done more to the close of the Settlement.

before Christmas. Water win probably he piped from the Amargosa river. Grading is now being done at the mine for a 22-horse power engine which is Good Springs.

Bingham Mining Notes.

(Bingham Bulletin.) C. Lavagnino, manager of the Butterfield mines, is daily expected to re-turn from the east, where he went several weeks ago on a business trip.

The United States company reports that the output of its Bingham mines during the month of March was 17,500 tons, the total production of lead ore having been 1,700 tons.

F. C. Dayton of New Haven, Conn., one of the stockholders in the Bing-

ment of 200 tons of lead ore will follow.

The air compressor at the Boston Con. has been given an overhauling, the inter-cooler supplied with new pipes and connections made with the Utah-Apex and Bingham Central, which will be supplied with air.

In order to facilitate the handling of lumber for the Highland Boy mine, the Copper Belt will put in a switch

the Copper Belt will put in a switch near the Boston Con., from which point the lumber will be conveyed to Northern Chief by John Brown, Simon Gavin and George Webb, leas-ers. The cross-cut is over 400 feet below the dip on the old workings.

EXCITEMENT CONTINUES.

District Five Miles From Virginia City, Nev., Apparently All Right.

"A cross cut has been driven into the side of the mountain for a distance of 100 feet. The first blast at twenty feet in disclosed the vein. At 100 feet in the wall has not yet been encountered. At ninety-five feet from the portal of the tunnel a drift has been cut at right angles. Samples taken from both sides of this drift show values running from \$2,000 to \$15,000 per ton. It is said that not a ton of ore has been taken from this tunnel that has carried values less than \$1,000.

"Grab samples taken all the way from where the ledge was encountered to the face of the tunnel carry values of discovery. In the coming of daylight yesterday morning the exodus to Moss! City commenced and all day long a string of vehicles passed over Geiger grade, and a large number of foot, says the Virginia Enterprise. Scores of locations were made, and development work begun in earnest. A great many locations have been made. There is an outcrop of over made. There is an outcrop of over the face of the tunnel carry values.

no doubts leads to a rich ledge.

A townsite 6,000x6,000 feet was located yesterday and will be surveyed in a few days and lots offered for sale. The townsite company yesterday offer-ed Steve Campana \$1,000 for his sa-loon, but he has been prospecting in that vicinity and has discovered float in numerous places assaying over \$1,00° per ton in gold, and he reused the offer The townsite has been named Desmondville, and a building to be used a will be under construction by tomor

Mining men of great experience who have been in nearly all the big mining camps say the camp has the brightest outlook of any district in which they have been. "The country," remarked a well known miner, "somewhat resembles the section around Butte City

FAITH IN YOUNG BLOOD.

That Is Why the American Explora tion Company Is Officered as it Is.

Daniel Gugggenheim, chairman o American Smelting Exploration direct-

ors, says:
"We believe our stockholders want profits and that work of the intelligent young men who are interested in the company and in its success will do when he might have had it for a song.

"'Our ledge points straight for their property,' he said yesterday, when talking of the new buy, 'and if they fail to get something of what we have here it will be because the deposits run out. The dyke strikes northeast and southwest on Montgamery mountain and southing abead and naving the way for fulling and the management is looking ahead and paving the way for fu-

horseback, showing many fine driving and riding horses.

The procession was ten blocks in length and marched east on Center street to Fourth East, thence countermarched to Academy avenue and north to the university, thence back to the bank corner and west to Fifth West street, countermarching to bank corner and marching south to the depot, and countermarching to the court house square, where the horses were exhibited, and the immense throng of spectators who had witnessed the parade gathered by the thousands in the street surrounding the square and were addressed from a carriage standing inside of the fence.

President Irvine congratulated the assembly upon the success of the fair, and solicited the support of the people in a united effort for a county fair association.

Brief speeches were made by Hon

senator was among his friends, and he (President Irvine) doubted if there were any enemies.

Senator Smoot said he probably should have had enough horse sense not to wear a stovenipe hat, referring to the trouble Congressman Howell had got into by riding behind white horses and wearing a tile, and here he was riding behind white horses, and by the side of two Democrats, who also wore stovenipes.

Senator Smoot then related an amusing if not profitable experience he had when he first went into the horse business and started with inferior stock. He had changed and had since owned some good horses. The senator snoke most encouragingly of the future of Utah valley, the garden snot of the world. Its beauty would be further enhanced by the proposed government irrigation project, which would clothes the now barren places with verdure and make them biossom with flowers, and provide homes for many people. He paid a high tribute to the horse, congratulated the Commercial club and the exhibitors on the fine display made, encouraged them to continue to improve their stock and to unite in a county fair association, working together in unison and abolfshing all discord to make the Utah valley the Eden of the Rocky mountains.

In the afternoon many people inspected

The Famors Shoe for Women. Rocky mountains.

In the afternoon many people inspected the animals, and the visitors spent the day at the university campus, where athletic snorts were given, and in visiting friends.

WALL'S BOND ON STARLESS.

According to a table compiled on information secured from the various mine managements, the Bingham Bulletin finds that the camp is now producing at the rate of 3.435 tons of ore per day, the number of men employed in doing it because of the stallions in line in the parade. Their value is estimated at \$150.600:
